

Environment Health & Safety

As a responsible & respected corporate group may we request your organization to take measures to provide Carrier with a safe working environment and all reasonable resources required to avoid threats of height and electricity, similar to the measures it takes for its employees.

Carrier has an Environment Health & Safety (EH&S) management program to ensure safety of Carrier's personnel/s or of its service providers. The program lays emphasis on "Safety First!" initiative which mandates Carrier employees or its representatives to work only in Safe conditions at all times. This includes but not necessarily limited to the following program:

- Fatality and Serious Injury Prevention – Working at Heights
- Fatality and Serious Injury Prevention – Working with Electricity

In order to enable Carrier or its service providers provide services in safe working environment, the Client must ensure the following:

- Safe Service Access
- Fall protection handrails at elevated locations
- Provision of safe access to the elevated locations complete with safety ladders.
- Provisions related to Electrical works.
 - Local electrical isolators to enable Lockout & Tag out procedure.
 - Provision of electrical-safe-ladders (Fiberglass ladders for use while attending to electrical complaints)
